Quality Made  
in the USA

Since 1977

## Heavy-Duty Industrial Cardboard Compactor

### EM-20G

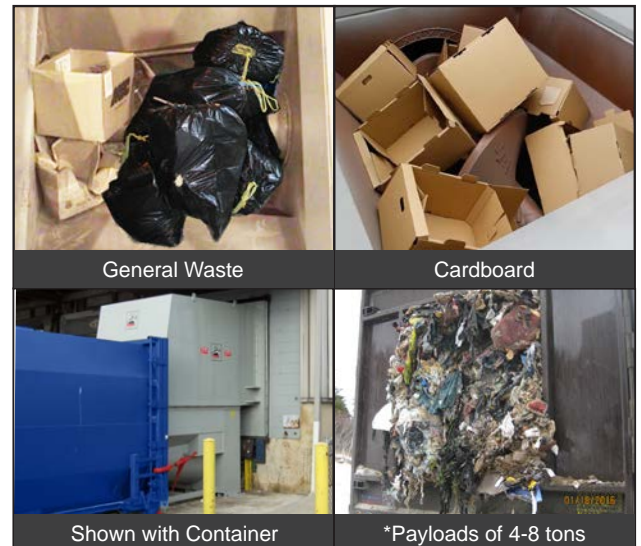

EM-20G with optional dock enclosure hopper

- Located outside your facility
- Shreds and compacts in one machine
- Significant volume reduction increases payload weights & lowers transportation costs
- Maximum uptime with minimal maintenance
- No more double/triple material handling
- Connects to standard receiving container
- Clean quiet electric drive, no hydraulic leaks

## Komar EM-20G Auger-Pak™

Komar's EM-20G Auger-Pak™ is a heavy-duty industrial compactor, ideal for medium volume cardboard applications. Processing up to two and a half tons of cardboard per hour, and packing four to eight tons of material directly into a 40 cubic yard container, this unit easily keeps pace with competitive technologies while offering several operational advantages. Unlike balers, the Auger-Pak™ is located outside your facility, freeing up valuable floor space, while eliminating the costs of handling of bales. With its continuous forward processing motion, spring back and bridging issues, common in ram style compactors, are eliminated. We use high quality, precision made parts to ensure significantly increased machine life with very low maintenance.

\* Load weights vary depending on material and loading method.

Dimensions and process data for reference only

Processing Specifications	
Horsepower	20
Tons per Hour	4.9
Feed Type	Hand, Forklift, Tipper, Conveyor
Receiving Container	Roll-Off up to 40 cu. yd.
Tons Per Container	4-8

Physical Specifications	
Footprint (L x W x H)	102" x 83" x 67"
Chamber Size (L x W)	70" x 69"
Full System Weight (lbs)	15,275
RPM / Torque (ft.-lbs.)	5.97 / 17,602

## INSTALLATION TYPES

### Dock Enclosure

- Shown with clear standard receiving container to illustrate attachment.

Installation Requirements	
Footprint w/ Concrete Pad	386" x 109"
Power Requirement	480 V, 3 PH, 60 Hz
Overcurrent Protection	50 amp MCP type breaker

Inside View

## Dock Enclosure with Tipper

Inside View

- Shown at 9' x 10' Standard Dock Door.
- Shown with clear standard receiving container to illustrate attachment.

## Dock Enclosure with Conveyor

Inside View

- Shown at 9' x 10' Standard Dock Door.
- Shown with clear standard receiving container to illustrate attachment.

# Komar Auger-Pak™

## EM-G Technology Overview

### ① Patented Solid Lube Bearing Support System

Allows for the use of the biggest and most powerful auger screws in the industry, resulting in maximum compaction force.

### ② Worry-Free Chain and Bearing Lubrication System

The engineered, automatically lubricated chain, coupled with the self-lubricated bearing system cuts down on routine maintenance.

### ③ Cast Steel Flights ④ Tapered Solid Alloy Steel Shaft

Using the highest quality components to construct our auger screws provides extended service life. The density and shape of the cast flights increases strength and durability, as well as more efficient material delivery to the receiving container. Our patented tapered shaft uniquely distributes forces along the shaft, minimizing stress on the bearings and maximizes shaft life.

### ⑤ Cycloidal Drive with 500% Shock Load

Don't judge a drive strictly by the motor's horsepower, especially when you plan to process heavy industrial materials. A high shock load rating is important in giving the compactor the ability to crush through large loads.

### ⑥ Ratchet Binders ⑦ Container Adaptor

The auger compacts directly into a standard roll-off receiving container typically provided by your local hauler, and meets ANSI and OSHA specifications.
